

Applications

Agriculture

- Cool animals and stables for pennies a day.
- Cool feeding areas, barns, stables, production areas and more for a fraction of traditional cooling costs.
- Create tunnel ventilation to cool barns and enclosed areas.
- Environmentally-friendly, emits no harmful fluorocarbons.
- Utilize outside facilities during hot summer months without jeopardizing animal health.
- Increase milk production in cows by cooling holding pens and exit lanes*.
- Evaporative cooling is the only commercially available cooling that actually decreases the actual THI (temperature-humidity index)**

Aviation

The stifling heat of summer can make aircraft maintenance unbearable, but Port-A-Cool® units can reduce temperature.

- Mechanics areas
- Aircraft Repair
- Commercial & Private Hangers
- Baggage Handling
- Recreational areas

Keep hangars cool all summer. Spot cool tight repair spaces or cool an entire hangar.

Cooling the Automotive Industry

Keep employees and equipment cool:

- Mechanics Bays
- Repair Centers
- Oil Change Centers
- Garages
- Workshops

OSHA studies show that worker productivity improves with cooler working environments. Keep work areas an average of 10° - 15°C cooler, making work or waiting areas more comfortable for workers and customers.

Industry Applications

Keep employees and equipment cool:

- Workshops
- Warehouses
- Assembly Areas
- Construction sites

Cool equipment for increased lifespan. OSHA studies show that worker productivity improves with cooler working environments.

Cooling the Military

Where and when it's needed:

- hangers
- flight lines
- maintenance shops
- outdoor activities
- warehouses
- tents
- mess halls

Training areas, artillery range and other places where heat may limit usability. Mess halls and outdoor dining areas are more comfortable for personnel. Keep recruitment centers and outdoor booths cool and comfortable.

Restaurants and Events

Effectively Cool Prep areas to Patios.

The stifling heat of summer can make outdoor patio areas off limits, but Port-A-Cool® units can reduce temperature by an average of 10° - 15°C.

Sports and Outdoor Recreation

Have fun and keep cool:

- Sidelines
- Locker Rooms
- Athletic Fields
- Health Clubs
- Gymnasiums
- Track & Field

Gyms and Health Clubs: Stay fit and be cool with Port-A-Cool® units. Keeps workout areas cooler and circulates stale air.
